

Sauel Almonte

Professional Summary

Full-Stack Developer and AI Engineer with hands-on experience building scalable web applications, integrating machine learning workflows, and deploying cloud-based solutions. Proficient in JavaScript, Python, React, and AWS services including EC2, S3, and IAM. Skilled in RESTful API development, CI/CD pipelines, and Agile/Scrum collaboration. Proven impact at Wayfair, North Light AI, and ULEM through system modernization, automation, and mentorship. AWS Cloud Practitioner Certified and currently preparing for the AWS Solutions Architect Associate exam.

Technical Skills

Languages & Frameworks: HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, Node.js, Express, ReactJS, NextJS, Python, C++, Bash/Shell Scripting

Databases: MongoDB, PostgreSQL, MySQL, SQL

Cloud & DevOps: AWS (EC2, S3, IAM and more), Docker, CI/CD pipelines

Tools & Workflow: Git, GitHub, Jira, Agile, Scrum, Slack, Microsoft Teams, Visual Studio Code, PyCharm

Systems & Productivity: macOS, Windows, Microsoft 365, Google Workspace

Education & Certifications

Bunker Hill Community College Boston, MA	09/2023 - Present
Computer Science A.S. & Mathematics Concentration A.A.	
Cisco Networking Academy C++ Essentials I & C++ Essentials II Boston, MA	07/2025
Per Scholas AWS re/Start Cloud Practitioner Certificate Boston, MA	02/2025 - 06/2025
LinkedIn Learning Advanced TypeScript Concepts	06/2025
HubSpot Academy Search Engine Optimization (SEO) Certificate I & II	02/2025
Coursera Meta Front-End Developer Professional Certificate	09/2023 - 12/2024
Hack.Diversity 2023 Hack.Diversity Fellow Certificate Boston, MA	01/2023 - 08/2023

Professional Experience

Urban League of Eastern Massachusetts	Boston, MA
Full-Stack developer and Coach/Mentor	05/2021 - 02/2025
Tech Stack: HTML, CSS, JavaScript, ReactJS, Tailwind CSS, Slack, Zoom	
- Developed a responsive website using ReactJS and TailwindCSS, increasing navigation speed by 40% - Optimized www.ulem.org, cutting load time by 37.5% and boosting engagement by 25% - Mentored 50+ students in coding and interviews, improving job readiness by 35% - Provided 25+ hours of live tech support, enabling 100% student project completion - Led weekly web dev sessions, raising framework proficiency by 30%	

North Light AI	Durham, NH
AI Engineer & Software Developer Project Manager Intern	09/2024 - 01/2025
Tech Stack: Python, OpenAI API (GPT-4, Whisper), Jupyter, GitHub, Agile	
- Integrated AI workflows with Python and OpenAI APIs, reducing operational bottlenecks by 27% - Built automation tools using GPT-4 and Whisper, increasing efficiency by 32% - Researched and implemented AI solutions, improving product performance by 28% - Designed ML models to enhance decision-making accuracy by 37% - Managed remote projects across teams, achieving 100% on-time delivery, boosting team efficiency by 26%	

Wayfair

Software Engineer Intern

Boston, MA

05/2023 - 08/2023

Tech Stack: Python, Kafka, Docker, GitHub, PyCharm, Agile, CI/CD

- Migrated monolithic system to microservices, increasing scalability by 35% and system efficiency by 20%
- Integrated Kafka for real-time data streaming, cutting processing time by 40%
- Developed CI/CD-ready Python apps with Docker, accelerating deployments by 30.5%
- Enhanced development workflows, reducing debugging time by 25%
- Contributed to innovation initiatives, driving a 12% retail expansion impact

Grand Circle Travel/Overseas Adventure Travel

IT Support & Travel Solutions Specialist

Boston, MA

10/2021 - 09/2024

Systems Used: Amadeus, Sabre, GERT, Azure, Bash/Shell Scripting

- Automated diagnostics with Bash and Azure CLI, boosting infrastructure reliability by 25%.
- Supported GERT and CRM tool integration by deploying and testing internal IT systems.
- Streamlined operations by delivering system feedback, improving workflows by 25%.
- Managed 100+ client itineraries daily using Amadeus and Sabre for seamless travel.
- Achieved 100% PCS ratings across 12 cycles, increasing loyalty and referrals by 3.5%

Projects

UnitedRelief (AWS Capstone Project) - A Full Stack disaster relief coordination platform leveraging AWS serverless architecture. - [GitHub](#) | [Live Demo](#)

Technologies: AWS Lambda, API Gateway, S3, DynamoDB, CloudFormation, Python, JavaScript

- Built a serverless AWS platform to automate relief request intake, file uploads, and real-time notifications
- Secured infrastructure with IAM, Secrets Manager, and CloudWatch for policy enforcement and auditing
- Enabled structured data storage and stakeholder alerts using DynamoDB, SNS, and Gmail SMTP integration

Book Recommendation System - [GitHub](#)

Technologies: Python, OpenAI API, LangChain, Gradio, Transformers, PyTorch, TensorFlow

- Built a semantic search-based recommendation engine using LLMs for personalized book discovery
- Integrated OpenAI, LangChain, and Chroma to perform zero-shot classification and sentiment analysis
- Deployed an interactive Gradio UI to enable real-time recommendations based on user input

Health Club Membership Fee Calculator - [GitHub](#)

Technologies: C++, iostream, iomanip, limits

- Created a C++ console app with menu-driven logic to calculate membership fees by type and duration
- Implemented modular functions with input validation to ensure error-free user interaction
- Applied formatted output with iomanip for professional-grade numeric display
